Product description

OmniPod Dash is a system for the drainless administration of insulin. Each pod is a mini insulin pump that, after application on the skin, works for 3 days, delivering insulin without using a drain. It is an absolutely innovative method, especially for people who value freedom and discretion in handling diabetes.

- Simple actuation including painless self-application of the soft integral cannula. Needle is not visible during injection.
- One pod is for 3 days
- Weatherproof and watertight system (IPX8: 7.6m deep under water for up to 60 Minutes)
- Perfect for children and adults
- To use pods you need pilot - PDM Device

Box with 10 pcs.

ATTENTION! To use this system and control the pods, you need to be registered user and have the Omnipod Dash receiver. OmniPOD is recommended for users who already use currently this system.
